E-mail ericlimmm115@gmail.com

Dedicated Software Developer that enjoys creating stunning applications with robust mechanisms. I take pride in my dedication to development, which I keep up until it performs satisfactorily. The thrill of seeing my pull requests being merged motivates me to actively contribute to various open-source projects during my leisure time.

Experience

Nov 2023 - Current

Software Engineer

One Terrace, Japan (Remote)

- Developed scalable and maintainable code, ensuring long-term stability of the software.
- Delivered end-to-end features in high-impact, production-grade applications.
- Participated in architecture discussions and system design for scalable solutions.
- Resolved complex technical challenges under tight deadlines.
- Maintained and enhanced legacy systems while integrating new capabilities.

Dec 2021 -
Jan 2023

Remote Frontend Developer

Singapore Startup, Singapore (Remote)

- Used React Native to build a mobile application as per the Adobe XD designs provided by the UI/UX team as well as integrated API provided by the back-end team.
- Communicated and contributed to the project as part of the team through agile management. Implemented vast amounts of features involving user authentication/verification, timetable, roll call, video chat, messaging, and so on.

Dec 2021 -
Feb 2022

ReactJS Instructor

Lattwae Education, Yangon

- Instructed students to give a better understanding of the core concepts of ReactJS library and JavaScript programming through LIVE coding sessions.
